Case Medical

Sustainable Products for Instrument Processing

Table of Contents

Company Overview

Case Medical is a U.S. manufacturer of medical reprocessing solutions that enable healthcare facilities to improve quality of care and patient outcomes, while managing and reducing costs. Our comprehensive approach ensures that all reprocessing systems work together seamlessly.

Simply put, our mission is to promote the health of your facility and your patients.

Case Medical, Inc., a vertically integrated manufacturer, is located in Bloomfield, NJ. We are ISO 13485 and ISO 27001 certified and FDA registered with FDA 510k clearance and CE mark for our products. The company has a partnership with the U.S. EPA under the Safer Choice program and participates in the Chemical Footprint Project to promote sustainability and safer chemistry.

What We Offer

Case Medical understands that our customers have many choices for medical device reprocessing solutions. Our customers tell us that they prefer to work with the Case Medical team and our solutions because of our integrated, systematic approach.

360 Degree Approach: Case Medical views everything that happens from the end of one surgery to the beginning of the next as one continuous process.

Sustainability: Case Medical is the only medical device reprocessing manufacturer ever recognized by the U.S. Environmental Protection Agency (U.S. EPA) as a Safer Choice Partner of the Year.

Instrument Protection: Case Medical containers and modular tray system ensure that surgical devices are safe, secure, and can be properly sterilized for patient care.

Universal Compatibility: Case Medical's container system has been cleared by the U.S. FDA for all current healthcare sterilization modalities and medical devices.

Validated Products: Case Medical products are validated though independent laboratories to perform as promised so you can be confident in our claims.

Customization Program: Case Medical will customize instrument sets to match surgeons' preferences in support of better patient care and more successful outcomes.

UDI Integration: 2D barcode integration enhances product functionality and links Case Medical products with our proprietary CaseTrak360 software.

SAFER CHOICE
Meets U.S. EPA Safer Product Standards

epa.gov/saferchoice

Our Vision

Case Medical provides only the highest quality, cost-effective products that are safe for patients, staff, and the environment. This enables healthcare facilities to achieve the holistic goals of the Cost, Quality and Outcomes (CQO) movement, established and championed by the Association for Health Care Resource & Materials Management (AHRMM).

- **Quality of Care** is confidence that every instrument is safe for patient use.

- **Cost Effective** medical reprocessing results in less waste, reduced inventory, and fewer OR delays.

- **Successful Outcomes** are achieved by using effective products that are safe for patients, staff, and the environment.

- **Successful Prevention** seeks to reduce the risks and costs associated with HAIs and hospital readmissions by choosing high quality, validated products.

SteriTite®
The Universal Sealed Container System

The SteriTite® container system is the ideal reusable packaging system. It is safer, more efficient and cost-effective than traditional wrap, and along with the MediTray® inserts, has been cleared by the U.S. FDA and has received the CE mark for use with all methods of sterilization commonly used in healthcare facilities.

All SteriTite containers are sold as a complete unit with lid, base and filter retention plates. SteriTite containers are competitively priced, virtually repair and replacement free, for a long useful life with potential for major cost savings.

- Full Size Containers

- Three-Quarter Size Containers

- Half Size Containers

- Long & Wide Containers

- Mini, Narrow & Narrow Long Containers

- FlashTite® Containers & Baskets

Note: For Biohazard transport, SteriTite sealed containers may be ordered without perforations in lid and base to isolate contaminated items.

Full Size Containers

SteriTite® containers and components in various sizes

Universal Compatibility: SteriTite® containers are part of a universal system, meaning they are compatible with all medical devices and current sterilizers. Containers are available with either a perforated or solid base and feature color-coded ID plaques with 2D bar codes to make identification a snap. Use with corresponding baskets on page 13.

Three-Quarter Size Containers

SteriTite® containers are sized to accommodate loaner sets

Drop-in Convenience: DIN-sized SteriTite® containers eliminate the need to wrap custom graphic (loaner) trays. This saves time and reduces the risks, delays and costs associated with reprocessing punctured wrapped trays. Additional benefits include the ability to stack trays and process in steam as well as STERRAD® and other low temperature sterilizers. Use with corresponding baskets on page 14.

Mini, Narrow & Narrow Long Containers

Visible case filter inside container lid

Puncture Proof: SteriTite® containers include smart features like visible filters and an offset vent pattern that is more resistant to strikethrough penetrations and less vulnerable to contamination and microbial intrusion. SteriTite Mini, Narrow and Narrow Long containers are ideal for scopes, robotic arms, bariatric and small instruments sets. Use with corresponding baskets on page 17.

FlashTite® Containers & Baskets

FlashTite® valve plates for drier IUSS processing

Rapid Sterilization: FlashTite® filterless valve plates are a faster drying bacterial barrier alternative to our disposable filter systems making them ideal for Immediate Use Steam Sterilization (IUSS). FlashTite filterless valve plates are FDA cleared for both pre-vac and gravity steam sterilization. Use the corresponding basket to secure the contents.

MediTray®
Instrument Baskets

The MediTray® family of instrument baskets fit within SteriTite® containers and feature a unique vent pattern that promotes fast drying. Additional system components including brackets, posts, partitions, and inserts, customize virtually any instrument set. Reconfigure as needed.

As with all SteriTite and MediTray products, aluminum components are anodized and stainless steel components are passivated for corrosion resistance.

MediTray®
Insert Trays

S ave time and space with stackable, interchangeable MediTray® insert trays. Reduce the need for duplicate containers and additional loads by providing a convenient way to secure instruments for a more efficient use of container space.

Trays fit within MediTray baskets which may be placed in compatible SteriTite® containers for sterilization, transport, storage, and aseptic removal of contents. Cleared for multi-modality sterilization and appropriate to wash in a bulk load.

— Endoscopy Tray Sets

— Insert Trays

Endoscopy Tray Sets

Secure endoscopy instrument sets

Secure instruments with "L" shaped handles: The MediTray® Endo Tray System is designed for devices like graspers, kerrisons, and forceps. An interior bridge with scalloped, silicone brackets holds multiple instruments securely in place. This creates a more efficient use of space, maximizes exposure to sterilants, and promotes fast drying. The base tray is used to secure scopes, cameras, and other accessories. An insert tray (included) houses trocars, cannulas, and light cables.

Part ID
Description | Three-Tier System for use with 6" High Full Size Container 21.6"x9.7"x5"
Dimensions (LxWxH) | (54.9x24.6x12.7 cm)

Insert Trays | Long Size Endo Trays

ENDOL1
Part ID
Description | Four-Tier System for use with 8" High Long Container 25.4x9.7"x6.7"
Dimensions (LxWxH) | (64.5x24.6x17 cm)
ENDOL1T456
Part ID
Description | Three-Tier System for use with 8" High Long Container 25.4"x9.7"x6.7"
Dimensions (LxWxH) | (64.5x24.6x17 cm)

Note: Utilize the four tier ENDOF1 in a full size SteriTite container for Lap Chole when numerous instruments are required for a procedure.

Insert Trays

Containerized tray conveniently lifts out as a single unit

Less Risk of Damage: MediTray® insert trays reduce the risk of damage to delicate and critical devices by providing dedicated containment that separates and secures these items during processing. Use with respective Meditray baskets. Posts are available to elevate and secure insert trays to baskets below.

SteriTite®
Single Use Consumables

SteriTite® consumables ensure that the containerized set is tamper proof, that the sterility of contents is maintained during transport and handling, and that sets that have been sterilized are identified. Use paper filters for rapid processing in steam sterilization cycles. Polypropylene filters are universal and required for H202 sterilization.

Order by item or in kits suitable for the sterilization method and container model. A kit of filters, seals and load cards ensures that the necessary consumables are there as needed.

— Filters & Single Use Kits

— Tamper Evident Seals

— Indicators & Load Cards

Filters & Single Use Kits

SteriTite® containers utilize single use filters

Protective Barriers: SteriTite® sealed containers require single use filters to create a bacterial barrier. Use paper filters for rapid processing for terminal steam sterilization. Polypropylene filters are universal and required for H2O2 sterilization including use in STERRAD®, V-Pro®, Sterizone® and other hydrogen peroxide systems. Order a kit of filters, seals, and load cards and have everything you need for sterilization of SteriTite and other DIN-size containers. Square filters (9"x9") are also available from Case Medical.

Consumables | Filters

| Part ID | **SCF01** |

White seals (SCS01W)
1 pk, 1000 ea/pk
Load cards (SCLH2024)
1 pk, 1000 ea/pk

Note: Use 7.5" diameter round filters for standard SteriTite and other DIN size containers. Use 10x4" rectangular filters for mini and narrow containers.

Tamper Evident Seals

Color coded seals identify process

Identification & Security: SteriTite® container tamper evident seals provide assurance that sets are processed, identified, and tamper proof. Container seals are available for steam and low temperature sterilization cycles. Identifier seals are used to designate items requiring repair or sharpening. White seals may identify clean items. Red biohazard seals identify contaminated (used) items.

Consumables | Tamper Evident Container Seals

Part ID | **SCS01B**
Description | Blue Container Seal for Steam & EtO Sterilization 1000/pk

Indicators & Load Cards

External load cards are sized to fit the respective container

Visual Process Monitor: SteriTite® Indicators and load cards are identification tags placed in dedicated slots on containers. The indicator changes colors when sets are sterilized. Steam and EtO indicators and load cards change from light to dark, while those for H2O2 change from red to orange (i.e. dark to light).

MediTray®
Case Trays

The unique MediTray® system of case tray units with perforated lid and base may be used within MediTray baskets to provide secure containment of delicate items or specialty devices within a set. Use wrappable Case Trays when containers are not used.

Dual Use Case Trays provide the ultimate flexibility as they can be wrapped or placed within SteriTite® and other DIN sized sealed containers.

- Dual Use Case Trays
- Insert Boxes
- Wrappable Case Trays
- Dental Cassettes

Dual Use Case Trays

Wrap or drop-in convenience

Dual Purpose: MediTray® Case Tray Inserts feature a lid, base, and locking mechanism. Use the provided screw-on feet when processed in SteriTite® and other DIN-sized sealed containers. Remove the feet to avoid tears when wrapped. BackBone® silicone brackets for securing rigid scopes are included with Scope Care Cases.

Part ID	**STCM2**

Description	Wide Case Tray
Dimensions (LxWxH)	24"x14"x4.5" (61x35x11.5 cm)

Insert Boxes

Available in various sizes

Grouping and Containment: MediTray® insert boxes provide a secure, size-appropriate container that enables small components and accessories to be processed with larger instruments without risk of loss or damage. Insert boxes provide improved protection and sterilant penetration, and are a reusable alternative to peel packs which cannot be placed within a container or wrapped set.

Dental Cassettes

Customizable Dental Trays: MediTray® dental cassettes accommodate instruments for a variety of procedures, allowing the devices within the set to be processed together, saving time, and improving organization. Made from the highest quality anodized aluminum, the cassettes may be wrapped or placed inside a SteriTite® sealed container. Ideal for high volume clinics and dental schools. Order trays per procedure or by component.

MediTray®
Components
& Partitions

Case Medical manufactures numerous components for instrument protection, organization, and to facilitate the instrument count process. Brackets and components conform to the diameter of surgical devices. They may be used in endless combinations and configurations to hold instruments singly or in groups.

Simply snap or secure into the perforations at the base of any MediTray® basket, tray, or insert for the ultimate in instrument protection.

Specialty Inserts

Assorted specialty inserts

Versatile protection: MediTray® accessories increase the value and versatility of the SteriTite® container system. Our wide range of options includes instrument stringers, screw caddies, and various racks for osteotomes, neuro dilators, and more. Consider our instrument stringers or instrument count rack for grouping and organizing ring-handled instruments. Use our peel pack rack to secure small packaged items and meet current standards.

Partitions & Posts

Partitions separate delicate from heavy devices

Separate and Secure: MediTray® partitions and posts separate and organize instruments within the tray. Partitions create compartments to separate instruments by type and to protect delicate instruments from damage. Posts provide separation between devices and may be used to stack ring-handled instruments in the open position. Attach to MediTray® base with threaded nuts available from Case Medical. Available in various sizes. See charts below.

SuperNova® Cleaners

Chemistries for every step

Super Concentrated for Super Efficiency: SuperNova® concentrated liquid cleaners have been validated by independent laboratory testing to produce a 99.9% reduction in organic soil and 6 log reduction in bioburden, all with formulations that are safe for patients, staff, and the environment. SuperNova® cleaners are highly concentrated, so they cost less per use, and display the U.S. EPA Safer Choice label. Highly concentrated for use in automated washers. Follow with further sterilization or disinfection when processing surgical devices.

Part ID	**CSNC01G**
Description	SuperNova®.1 Multi-Enzymatic Cleaner Super Concentrate
Net Contents	4x1 Gal (3.78 L) Btl per case
	CSNC01W
	2x2.5 Gal (9.46 L) Btl per case

Part ID	**CSNB01G**
Description	SuperNova®.1 NpHD Neutral pH Detergent Super Concentrate

	CSNCD1W
	2x2.5 Gal (9.46 L) Btl per case

Part ID	**CSC011**
Description	PentaZyme® Multi-Enzymatic Cleaner Concentrate
Net Contents	4x1 Gal (3.78 L) Btl per case Ideal for Endoscopy Suite

Part ID	**CSSTR011G**
Description	Schmutzoff® Descaler Stainless Steel Cleaner
Net Contents	4x1 Gal (3.78 L) Btl per case
	CSSTR016W
	2x2.5 Gal (9.46 L) Btl per case

Part ID	**CSNL01G**
Description	InstruCreme® Lubricant Concentrate
Net Contents	4x1 Gal (3.78 L) Btl per case
	CSNL01W
	2x2.5 Gal (9.46 L) Btl per case

Cleaners, Solvents & Lubricant

Pre-cleaners start the process

Chemistries for Every Step: Case Solutions® include an assortment of instrument chemistries, wipes, solvents, lubricant, and ready-to-use cleaners. Multi-enzymatic PentaPrep® or CasePrep®, our non-enzymatic pre-cleaner begin the process. Consider PentaZyme® with more active enzymes and our Bedside Kit for the endoscopy suite. Use PentaWipes® and Alcohol Wipes for surface cleaning, and Schmutzoff® for reconditioning stainless steel instruments, for removing residue from automated washers and autoclave walls. Apply CSR for ink and adhesive removing. Follow with subsequent cleaning and rinsing.

Case Care®

Case Care® Wipes and Solutions for Cleaning and Sanitizing

Safer Products for Personal Care and Infection Prevention: Formulated with only the safest ingredients applied to a single use wipe or a ready to use solution. From surface cleaning, cleansing, and sanitizing, Case Care® Wipes come in a handy, lightweight packet. Our infection prevention kit brings together the essentials for surface cleaning, sanitizing, and disinfection. Use the Case Care Cleanser or single use wipe when skin is soiled, before and after meals, and for personal care. Sustainable plant based cleanser with coconut, aloe, lavender and vitamin E.

Part ID	**CCW001**
Description	Alcohol Wipes
	Surface Disinfectant
	70% Denatured Alcohol
Net Contents	60 per pack (12 per case)
Dimensions	8"x7" (20.3x17.7 cm)

RO Water Systems

RO system for optimal water purification

Purer Water for Better Results: Case Medical provides Reverse Osmosis (RO) Water Systems that efficiently remove contaminants including sediment, total dissolved solids (TDS), and microorganisms, that damage processing equipment and surgical devices. The result is critical water, required for the final rinse, which can improve the entire cleaning process and the steam quality in autoclaves, and enhances patient safety. Add an optional storage tank for consistent supply and a UV Light disinfection system.

Part ID **CSROAT02**
Description AT Series RO system produces up to 500 gallons per day

Part ID **CSROAT01**
Description AT Series RO system produces up to 1000 gallons per day

Part ID **CSROBT01**
Description BT Series RO system produces up to 2,000 gallons per day

Part ID **CSROCT01**
Description CT Series RO system produces up to 7,000 gallons per day

Part ID **CSROTANK**
Description Storage Tank to collect the high-purity RO water for later use

Part ID **CSROUV01**
Description UV Water Purification System destroys 99.9% of waterborne microorganisms

Note: Carbon filters, pre-filters, and membranes are available from Case Medical for the specific RO system.

Pumps & Dispensers

Accurate and economical dosing

Accurate Dosing: Case Medical offers automated pumps and dispensers to precisely control and record the amount of chemicals used in loads to produce the best possible results. They provide an electronic record of temperature and dosing for quality assurance and regulatory requirements. Automated dosing ensures that you always use the right concentration and get the biggest bang for your buck.

Pre-Soak Dosing System for manual cleaning

Description	3-product Liquid Chemical Dispenser with Remote Control and Washer Interface Module

Instrument Brushes & Brush Kits

Various sizes identified for use

Cleaning Hard to Reach Areas: Case Solutions® instrument cleaning brushes are perfect for lumened devices, crevices, and hard to reach surfaces. Nylon bristle brushes feature a proprietary blunted tip to minimize the risk of punctures and a twisted stainless wire handle for a rigid yet flexible grip. A color-coded bead identifies the diameter. Brushes are sold in packs of 12 or available in kits. Request the instrument brush rack to organize by type.

CSIBK1 GENERAL			CSIBK2 MICRO/EYE

Tooth brush style, endoscope, and double ended brushes are also available in packs of 12

Part ID | **CSIBK1**
Description | General surgery

Part ID | **CSIBK2**
Description | Micro eye

Part ID | **CSIBK3**
Description | Endoscopy

Note: To clean your cannulated instruments, choose the correct size brush. The color of the brush identification bead is related to the diameter of the brush. The last two digits of the part number provide the length.

Case Soil® Wash Indicator & Test Kits

Products to monitor the cleaning process

Quality Assurance: Case Soil® Wash Indicators and Case Solutions® Test Kits provide the ability to diagnose and address issues when results are not meeting expectations. Test Kits work at the front end of the process to assess water quality variables. Case Soil Indicators and Protein Detector provide information at the back end of the process to ensure that automated washers, ultrasonic cleaners, and detergents are working properly.

SteriTite®
Case Carts & Shelving

Case Medical manufactures open and closed case carts in single and double bay configurations, as well as triple bay storage racks. Designed for storage and transport, the universal size fits all sealed container systems and supplies. The stainless steel perforated shelves are fully adjustable and may be disassembled for cleaning.

The durable construction and materials withstand elevated temperatures and chemical agents. Storage racks are designed with the same durable, stainless steel materials and locking wheels.

— Closed Case Carts

— Open Case Carts & Shelving

Closed Case Carts

Stainless steel components for enduring quality

Secure Transportation and Storage: The SteriTite® Case Cart system provides a safe and convenient way to transport and store surgical devices and supplies. Enhanced features include durable stainless steel construction, efficient use of space, adjustable perforated shelves, shock absorbing wheels with stainless steel casters, and a 2D bar code for tracking. Available in various sizes to meet the needs of the surgical specialty. Case carts with suffix D1 are extra deep and wide. Add a disposition monitor to identify clean from soiled (used) loads.

Open Case Carts & Shelving

Open Case Carts for storage and transport

Mobile Shelving and Transport: SteriTite Open Case Carts & Shelving are designed for ease of use, and for storage and transport of containers and wrapped sets. Open case carts share the same enhanced features as closed case cart models, including adjustable perforated shelves to avoid tears in the wrappers, as well as shock absorbing wheels with stainless steel casters. No matter the size of the shelving unit it can be moved for transport and for environmental cleaning. Designed to house DIN-sized containers on individual shelves or to stack one on top of the other based on your requirements.

CaseTrak360®
Software

CaseTrak360® software provides instrument tracking through every phase of reprocessing from decontamination to the operating room with full traceability between instrument sets and patients. It is all inclusive software at an affordable price, ideal for community based health care facilities as well as consolidated networks.

CaseTrak360 streamlines compliance with directives, improves communication, and shortens training periods and learning curves. Easily customizable to fit your work flow with touchscreen technology and fully cloud based. Utilize Loaner module, Tissue module, Endo module or Item module, as part of the CaseTrak360 software or acquire as individual modules. Use the UDI code on the container for instrument set tracking.

— CaseTrak360®

— Additional Software Modules

Note: For medical device companies requiring tracking and tracing of loaner sets, Case Medical offers its all inclusive software, Loaner Locate®.

CaseTrak360®

SteriTite® Container with 2D barcode and 2D set identifer

360° approach: CaseTrak360® was developed to be the indispensable nerve center for high functioning instrument processing. Our extensive databases and proprietary algorithms consolidate all of the moving parts involved in sterile processing and the OR into informative dashboards, standardized reports and custom queries. CaseTrak360 uses an unique identification number to track instruments sets and specialty devices to the patient level for increased safety and infection prevention.

CaseTrak360 Main Menu provides navigation to each module and a hierarchy of use for each user.

CaseTrak360 Dashboard View displays set information, i.e. location, turnaround, repair and missing items, and reprocessing instructions.

CaseTrak360 SPD Menu provides the schedule, actions and views to manage the department and administrate the functions.

CaseTrak360 Prep & Pack provides assembly instructions, direct link to oneSOURCE, photos, videos, count sheet , quality checks and alerts.

CaseTrak360 Sterilization module links equipment, monitoring, maintenance records, to a set for tracking and tracing.

CaseTrak360 OR module links a case to the OR schedule through staging, receiving, and return of items after a procedure

Additional Software Modules

CaseTrak360® modules are easy to use, intuitive by design and comprehensive for the task.

All that is required and more: Loaner, Endo, Tissue and Item specific modules are additions to CaseTrak360® that can be used as stand alone solutions for the management and tracking of endoscopes, tissue and graft materials, and equipment assets. Designed to function individually they are a cost effective solution for specific tasks that don't require a software bundle. Now available, CaseTrak360 software for eye surgery centers to manage your process and your assets in real time.

Software | Loaner Locate®

Loaner Locate®, finally, a software module designed to streamline and manage the loaner tray process from scheduling, receiving, use and return. Available to health care facilities as part of CaseTrak360 or as a stand alone software app.

Software | Endo Module
Endo Module tackles the workflow associated with endoscope re-processing, storage, and inventory management. As a stand alone module it is well suited to the needs of endoscopy clinics and larger facilities that handle endoscopes separate from the regular SPD.

Software | Tissue Module

Tissue Module documents every step from receiving confirmation, storage and utilization of tissues and other biomaterials required for various surgical procedures including transplants and grafts.

Software | Item Module

Item Module is the flexible software solution for tracking and managing individual items such as sterilization containers, equipment or medical devices. A bar coded item can be located simply and quickly in real time including any individual associated with its care and handling.

MediTray®
Customization

Meditray® Customization sets the standard for the ultimate in instrument protection and organization. Our patented system of SteriTite® containers, trays and inserts provide flexible, modular layouts that are easy to use, reduce errors, and contribute to safer outcomes.

MediTray Basic Sets can be built for virtually any procedure. MediTray Web Sets® are pre-assembled, customized tray systems that provide the ultimate in instrument protection. Our representatives are trained to assist you in selecting a set for your needs.

Da Vinci® Instrument Sets

SteriTite container & custom insert for robotic arms.

Developed with your input and validated with Intuitive Surgical: Introducing a containerized option to sterilize, transport, and secure your valuable da Vinci robotic devices, instrumentation, and endoscope. No need to wrap these devices and be subject to tears, punctures, and subsequent reprocessing. Our SteriTite containers and custom trays provide the utmost device protection and assures that the device is ready when needed in the OR for the next procedure.
Da Vinci Xi Single Site
YNB1068B16N + SC06L(G)
Da Vinci Xi Instrument Set
YNB1067B16N + SC06L(G)
Custom Da Vinci Xi Instruments

Case Medical®

Custom Manufacturing

Case Medical is an ISO certified, FDA registered medical device manufacturer. Our team of engineers utilize state-of art CAD/CAM technology, including 3-D modeling. All designs and products are produced in-house where all aspects are controlled and custom-tailored for exact compliance to customer's specifications and regulatory requirements.

Bringing all processes in-house, we've saved considerable time in providing you with the best quality at an affordable cost.

Facilities Listing

Advanced technology for quality products

Vertically integrated manufacturer: Case Medical® has invested heavily in the latest technology. Technologically advanced equipment include: hydraulic punch presses, CNC lasers, 450 Ton drawing press, complete machine shop, welding, and anodizing/passivation line. We are experienced in all phases of sheet metal manufacture, liquid injection molding, chemical formulation, and software development. The following facilities listing is to inform you of our capabilities.

ENGINEERING:

State of the art 3-D CAD/CAM system with capability to accept all major CAD files. Advanced Manufacturing Resource Planning (MRP) system. Direct link from engineering to shop machinery.

MANUFACTURING:

Amada Vipros King CNC turret press
Amada Vipros ACE CNC turret press
Amada Pulsar 1212 CNC lasers
CNC nylon coating machine
Hydraulico 450 Ton drawing press
Omera CNC trimming machine
Star SH12 CNC Swiss screw machine with automatic feed
Hardinge CNC lathe
Milltronics 3 axis machining center
Amada CNC press brakes with 3 axis back gauge
Wysong 5' shear
Mechanical press brakes
Haegar riveting/press machines
Empire bead blasting machines
Timesavers 37" wet surface sander
Falls edge deburring machine
Spot welders including aluminum spotwelding
NCG Sureweld TIG welder
Vibratory Tumbler/polishers
Ryobi cut off saw
Do All band saw
Floor lathe
Fray milling machine
Niagara circle cutter
Silk screening stations, image processor and drying oven
Laser Marking
Epson Laser Etching Machine
Engraving machine and chemical etch station
Automatic filling, labeling & capping line EE-440B
QC lab with spectrophotometer
Silicone Injection Molding Machine
3D Printer for custom prototypes
Anodizing and Passivating Line
Automated Wet Wipe Machine
CNC Controlled Filter Cutting Equipment
*Our mission is to promote the health
of your facility and your patients*
